# Markdown-Script

## About

This is a template repository for creating a PDF document from markdown files. It uses [Pandoc](#) to convert the markdown files to a PDF document.

You can download the merged file at [merge.pdf](#)

## How to Contribute

1. Fork [this](#) Repository
2. Commit and push your changes to **your** forked repository
3. Open a Pull Request to this repository
4. Wait until the changes are merged
